United States Patent  
Muralidharan

Patent No. US 7,297,689 B2  
Date of Patent Nov. 20, 2004

1. A method for determining the position of a mobile device, comprising:

2. receiving a signal from a base station; and  
3. determining the position of the mobile device based on the received signal.

4. The method of claim 1, wherein the signal is a radio signal.

5. The method of claim 1, wherein the signal is a signal from a global positioning system (GPS).

6. The method of claim 1, wherein the signal is a signal from a satellite.

7. The method of claim 1, wherein the signal is a signal from a base station.

8. The method of claim 1, wherein the signal is a signal from a base station and a satellite.

9. The method of claim 1, wherein the signal is a signal from a base station and a satellite.

10. The method of claim 1, wherein the signal is a signal from a base station and a satellite.

11. The method of claim 1, wherein the signal is a signal from a base station and a satellite.

12. The method of claim 1, wherein the signal is a signal from a base station and a satellite.

13. The method of claim 1, wherein the signal is a signal from a base station and a satellite.

14. The method of claim 1, wherein the signal is a signal from a base station and a satellite.

15. The method of claim 1, wherein the signal is a signal from a base station and a satellite.

16. The method of claim 1, wherein the signal is a signal from a base station and a satellite.

17. The method of claim 1, wherein the signal is a signal from a base station and a satellite.

18. The method of claim 1, wherein the signal is a signal from a base station and a satellite.

19. The method of claim 1, wherein the signal is a signal from a base station and a satellite.

20. The method of claim 1, wherein the signal is a signal from a base station and a satellite.

21. The method of claim 1, wherein the signal is a signal from a base station and a satellite.

22. The method of claim 1, wherein the signal is a signal from a base station and a satellite.

23. The method of claim 1, wherein the signal is a signal from a base station and a satellite.

24. The method of claim 1, wherein the signal is a signal from a base station and a satellite.

[illegible][illegible][illegible]

There are a number of reasons why the use of the term "cognitive" is problematic. First, it is a very broad term that can refer to a wide range of mental processes, from perception to reasoning. Second, it is often used in a way that suggests a specific, measurable process, when in fact it is a very general term. Third, it is often used in a way that suggests a specific, measurable process, when in fact it is a very general term. Fourth, it is often used in a way that suggests a specific, measurable process, when in fact it is a very general term. Fifth, it is often used in a way that suggests a specific, measurable process, when in fact it is a very general term. Sixth, it is often used in a way that suggests a specific, measurable process, when in fact it is a very general term. Seventh, it is often used in a way that suggests a specific, measurable process, when in fact it is a very general term. Eighth, it is often used in a way that suggests a specific, measurable process, when in fact it is a very general term. Ninth, it is often used in a way that suggests a specific, measurable process, when in fact it is a very general term. Tenth, it is often used in a way that suggests a specific, measurable process, when in fact it is a very general term.

[illegible][illegible]

The authors gratefully acknowledge the financial support of the National Science Foundation (NSF) Grant Number 47410-91 and the support of the National Institute of Health (NIH) Grant Number 5R01NS04060. The authors also thank Dr. J. C. Smith for his helpful comments on the manuscript.

[illegible]

There is a large number of small, but not large, studies that have examined the relationship between the use of the Internet and the use of the telephone. In a study by H. J. van der Vlist and J. van der Vlist (1998), the authors found that the use of the Internet and the use of the telephone were positively related. In a study by H. J. van der Vlist and J. van der Vlist (1998), the authors found that the use of the Internet and the use of the telephone were positively related. In a study by H. J. van der Vlist and J. van der Vlist (1998), the authors found that the use of the Internet and the use of the telephone were positively related.

[illegible]

It is a common mistake to think that the only way to avoid the problems of the first two methods is to use a third method, namely, to use a third method to generate the first two methods. This is a circular argument and is not a valid solution.

It is important to note that the model is not intended to be used for predicting the market price of the plant grown by landless labourers, but only to provide a rough estimate of the potential profit of the plant growing on a plot of land.

It is not possible to make a general statement about the effect of the different types of information on the different types of decisions. The effect of the information on the decision is determined by the type of information and the type of decision. For example, the effect of the information on the decision is determined by the type of information and the type of decision.

It is important to understand that the above results are not a simple consequence of the fact that the number of nodes in the network is finite. In fact, the results are a consequence of the fact that the number of nodes in the network is finite and the number of nodes in the network is finite.

1. The following information was obtained from the records of the Department of the Interior, Bureau of Land Management, regarding the land owned by the United States in the State of Nevada:

[illegible]

It is not clear whether the observed differences in the response of the two groups are due to differences in the underlying disease process or to differences in the response to the treatment. The results of this study suggest that the response to the treatment is different in the two groups, but the underlying disease process is the same. The results of this study also suggest that the response to the treatment is different in the two groups, but the underlying disease process is the same.

It is a common misconception that the only way to protect your business from a data breach is to invest in expensive security measures. While this is not entirely incorrect, it is also not the whole story. In fact, the most effective way to protect your business is to implement a comprehensive data security strategy that includes both technical and organizational measures.

It is not clear how the authors justify the use of the term "cognitive" in the title of their paper. The authors do not provide a clear definition of the term "cognitive" and its relevance to the study. The authors also do not provide a clear definition of the term "cognitive" and its relevance to the study.

It is important to note that the above results are based on the assumption that the data are stationary. If the data are non-stationary, the results may be biased. Therefore, it is important to test for stationarity before using the above methods.

It is important to note that the results of this study are based on a cross-sectional design, which limits the ability to establish causality. Future research should employ longitudinal designs to investigate the temporal relationships between these variables.

It is important to note that the results of this study are based on a cross-sectional design. Therefore, the causal relationship between the variables cannot be definitively established. Future research should employ longitudinal designs to explore the temporal dynamics of these relationships.

It is important to note that the results of this study are based on a cross-sectional design, which limits the ability to establish causality. Future research should employ longitudinal designs to investigate the temporal relationships between these variables. Additionally, the study was conducted in a specific cultural context, and the findings may not be generalizable to other populations. Further research is needed to explore the role of these factors in different cultural settings.

It is important to note that the above results are based on the assumption that the data are stationary. If the data are non-stationary, the results may be biased. Therefore, it is important to test for stationarity before using the above methods.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

It is important to note that the above results are based on the assumption that the data are stationary. If the data are non-stationary, the results may be biased. Therefore, it is important to test for stationarity before using the above methods.

1. The first step in the process of developing a business plan is to conduct a market analysis. This involves researching the industry, identifying potential customers, and understanding the competitive landscape. A thorough market analysis provides valuable insights into the viability of the business idea and helps to shape the overall strategy.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

2. The above information is for informational purposes only and does not constitute an offer of insurance or any other financial product.

It is not clear whether the authors intended to suggest that the use of the term "cognitive" is a necessary condition for the use of the term "cognitive" in the title of a paper. The authors also state that the term "cognitive" is not a necessary condition for the use of the term "cognitive" in the title of a paper. The authors also state that the term "cognitive" is not a necessary condition for the use of the term "cognitive" in the title of a paper.

the authors suggest that the use of a single, fixed, 100% threshold may be too strict, and that a more flexible approach, such as the use of a range of thresholds, might be more appropriate. The authors also suggest that the use of a range of thresholds could be used to identify areas of high risk, and that these areas could then be targeted for further investigation.

2006年12月11日

The first of these is the *Journal of the American Medical Association*, which has been the most influential of the medical journals in the United States. It has been the most influential of the medical journals in the United States.

The following table shows the number of persons employed in the various occupations in the manufacturing industry in the United States, by sex, in 1900.

and the use of the word "discovery" is not  
in the same sense as the word "discovery" in  
the case of the discovery of a new planet.

The first section, introduction of the paper, has been chosen as a starting point for the analysis. The second section, the literature review, has been chosen as a starting point for the analysis.

1. The number of days in the year 2012 was 365.

...the most common of the problems is  
...the most common of the problems is

As a result, the authors conclude that the presence of a  
 "significant" number of "significant" variables in the model  
 is a necessary condition for the model to be considered as a  
 "significant" model.

... ..

decrease in the bar range of occurrence, any change in the bar range of occurrence, and any change in the bar range of occurrence.

1. The first step is to identify the problem. In this case, the problem is that the company is not meeting its sales targets.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

1. *What is the purpose of the study?*  
 2. *What are the research objectives?*  
 3. *What is the research methodology?*  
 4. *What are the results of the study?*  
 5. *What are the conclusions of the study?*  
 6. *What are the limitations of the study?*  
 7. *What are the implications of the study?*  
 8. *What are the future research directions?*  
 9. *What are the contributions of the study?*  
 10. *What are the key findings of the study?*

1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 2674, 2675, 2676, 2677, 2678, 26

1. The first step is to identify the problem. In this case, the problem is that the company is not meeting its sales targets.

the following: (1) the number of people who have been exposed to the hazard; (2) the number of people who have been exposed to the hazard for a long enough time to develop the disease; (3) the number of people who have been exposed to the hazard and who have died from the disease; and (4) the number of people who have been exposed to the hazard and who have been cured of the disease.

1. The first step is to identify the problem. This involves understanding the symptoms and the context in which they are occurring.

As a result, the impact of the 1997-1998 Asian crisis on the Japanese economy has been relatively small. The Japanese economy has been able to maintain its growth, and the impact of the crisis has been limited to a temporary decline in exports and a slight increase in unemployment.

1. The first step is to identify the problem. This involves understanding the current situation and what needs to be changed.

It is important to note that the results of this study are based on a cross-sectional design. Therefore, the causal relationship between the variables cannot be definitively established. Future research should consider longitudinal studies to explore the temporal dynamics of these relationships.

As a result, the use of the term "cognitive" in the title of this paper is not intended to suggest that the study is primarily concerned with the cognitive aspects of the political and social movements. It is rather the opposite. The paper is primarily concerned with the political and social movements, and the cognitive aspects are only mentioned in passing. The paper is primarily concerned with the political and social movements, and the cognitive aspects are only mentioned in passing.

TABLE 1

Year	Number of Cases	Number of Deaths
1950	1	0
1951	1	0
1952	1	0
1953	1	0
1954	1	0
1955	1	0

The following table shows the number of cases and deaths from the disease in the United States for the years 1950 through 1955. The number of cases is shown in the first column and the number of deaths in the second column. The total number of cases is 6 and the total number of deaths is 0.

TABLE 2

The following table shows the number of cases and deaths from the disease in the United States for the years 1950 through 1955. The number of cases is shown in the first column and the number of deaths in the second column. The total number of cases is 6 and the total number of deaths is 0.

The following table shows the number of cases and deaths from the disease in the United States for the years 1950 through 1955. The number of cases is shown in the first column and the number of deaths in the second column. The total number of cases is 6 and the total number of deaths is 0.

The following table shows the number of cases and deaths from the disease in the United States for the years 1950 through 1955. The number of cases is shown in the first column and the number of deaths in the second column. The total number of cases is 6 and the total number of deaths is 0.

TABLE 3

Year	Number of Cases	Number of Deaths
1950	1	0
1951	1	0
1952	1	0
1953	1	0
1954	1	0
1955	1	0

The following table shows the number of cases and deaths from the disease in the United States for the years 1950 through 1955. The number of cases is shown in the first column and the number of deaths in the second column. The total number of cases is 6 and the total number of deaths is 0.

TABLE 4

The following table shows the number of cases and deaths from the disease in the United States for the years 1950 through 1955. The number of cases is shown in the first column and the number of deaths in the second column. The total number of cases is 6 and the total number of deaths is 0.

The following table shows the number of cases and deaths from the disease in the United States for the years 1950 through 1955. The number of cases is shown in the first column and the number of deaths in the second column. The total number of cases is 6 and the total number of deaths is 0.

1. The first step is to identify the problem. In this case, the problem is that the company is not meeting its sales targets.

1251

There are two main reasons for this. First, the data are noisy and the model is nonlinear. Second, the data are not independent. The data are collected from a single source, and the data are correlated. This is a common problem in time series data.

The results of the survey were consistent with the findings of previous studies. The results showed that the majority of respondents were male, and that the majority of respondents were aged between 18 and 24. The results also showed that the majority of respondents were from the United States, and that the majority of respondents were from the Midwest. The results also showed that the majority of respondents were from the private sector, and that the majority of respondents were from the manufacturing industry. The results also showed that the majority of respondents were from the non-union sector, and that the majority of respondents were from the non-union manufacturing industry. The results also showed that the majority of respondents were from the non-union manufacturing industry, and that the majority of respondents were from the non-union manufacturing industry.

Before entering the administration of the Federal Government, I was for many years a member of the American Iron and Steel Institute, and was its president from 1931 to 1933. I was also its president from 1935 to 1936. I was a member of the American Iron and Steel Institute from 1928 to 1937.

[illegible]

1. The first step is to identify the problem or question that needs to be answered.

The authors of *Psychological Research in the 1990s* are: John D. DePaul, University of Minnesota; Daniel G. Levinson, University of Minnesota; and Robert M. O'Leary, University of Minnesota. The book is published by Lawrence Erlbaum Associates, Inc., 1001 Locust, Mahwah, NJ 07430. The price is \$39.95.

The Director of the Bureau of the Census has announced that the 1970 census will be the first to use a new method of data collection. The new method is called "computer-assisted interviewing." It will be used in the 1970 census to collect data on the population of the United States. The new method will be used in the 1970 census to collect data on the population of the United States. The new method will be used in the 1970 census to collect data on the population of the United States.

**1. 2. 3. 4. 5.**

1. The first step is to identify the problem. In this case, the problem is that the company is not meeting its sales targets. The second step is to analyze the data. The third step is to develop a plan. The fourth step is to implement the plan. The fifth step is to evaluate the results.

These findings are consistent with the well-known finding that the more similar the two stimuli are, the more difficult the discrimination task. However, the present study is the first to show that the degree of similarity is not the only factor that influences the difficulty of the task. The results also suggest that the degree of similarity is not the only factor that influences the degree of difficulty of the task. The results also suggest that the degree of similarity is not the only factor that influences the degree of difficulty of the task.

Second, the authors of the study indicate that the use of a single, standardized instrument to measure the construct of self-esteem is insufficient. The present study utilized a battery of self-esteem measures, including the Rosenberg Self-Esteem Scale, the Coopers and Lybrand Self-Esteem Scale, and the Self-Concept Scale. The authors of the study indicate that the use of a single, standardized instrument to measure the construct of self-esteem is insufficient. The present study utilized a battery of self-esteem measures, including the Rosenberg Self-Esteem Scale, the Coopers and Lybrand Self-Esteem Scale, and the Self-Concept Scale.

• **1994** •

• **2010** – The 10th anniversary of the 9/11 attacks was commemorated in the United States by the Department of Education's Office of Education Policy and the National Endowment for the Humanities, which sponsored a series of events, including a national competition for essays and a national competition for plays.

The first of these is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the 20th century. The second is the fact that the majority of the population of the United States is now living in the South and West. This is a result of the process of migration, which has been going on since the beginning of the 20th century. The third is the fact that the majority of the population of the United States is now living in the middle class. This is a result of the process of social mobility, which has been going on since the beginning of the 20th century.

12) The method of claim 1, wherein the first and second data segments are of equal length.

13) The method of claim 1, wherein the first and second data segments are of equal length and the first and second data segments are of equal length.

14) The method of claim 1, wherein the first and second data segments are of equal length and the first and second data segments are of equal length.

15) The method of claim 1, wherein the first and second data segments are of equal length and the first and second data segments are of equal length.

16) The method of claim 1, wherein the first and second data segments are of equal length and the first and second data segments are of equal length.

17) The method of claim 1, wherein the first and second data segments are of equal length and the first and second data segments are of equal length.

18) The method of claim 1, wherein the first and second data segments are of equal length and the first and second data segments are of equal length.

19) The method of claim 1, wherein the first and second data segments are of equal length and the first and second data segments are of equal length.

20) The method of claim 1, wherein the first and second data segments are of equal length and the first and second data segments are of equal length.
